Ingredients

Processed Grain By-Products, Grain Products, Calcium Carbonate, Potassium Chloride, Salt, Magnesium Oxide, Vegetable Fat, Manganese Hydroxychloride, Zinc Hydroxychloride, Selenium Yeast, Basic Copper Chloride, Vitamin E Supplement, Ethylenediamine Dihydriodide, Cobalt Proteinate, Thiamin Hydrochloride, Vitamin A Supplement, Vitamin D Supplement, Yea-Sacc 1026®, Molasses Flavoring

Directions for Use

Feed Mix Show Feed is designed for cattle in the show ring. Cattle should be gradually adjusted to prevent digestive disturbances. For best results, feed twice daily at a rate of 2% of body weight. Do not self-feed. Good quality, fresh forage in the form of hay or pasture should be provided. Fresh, clean water should always be available.

Caution

Do not feed to sheep due to high copper levels. Do not allow horses or other equines access to formulation containing Monensin. Ingestion of Monensin by equines has been fatal. Monensin medicated cattle feed is safe for use in cattle only. Do not exceed the levels of Monensin recommended by the feeding directions, as reduced average daily gains may result. If feed refusals containing Monensin are fed to other groups of cattle, the concentration of Monensin in the refusals and amount of refusals fed should be taken into consideration to prevent Monensin overdosing. A withdrawal time has not been established for pre-ruminating calves. Do not use in calves to be processed for veal
