Directions for Use

Feed Mix Horse Pellet is a supplemental feed for horses for at maintenance or performance, ponies, and miniatures. Feeding rates depend on the quality of forage, activity level, age, breed, and individual metabolism of each horse. Fresh feed and roughage should be supplied daily, preferably twice a day. Gradually change feed rates to prevent digestive disturbances. Fresh, clean water should be available at all times.

Caution

Do not feed to sheep due to high copper levels.

Manufactured by:

414 7th St W
Harvey, ND 58341
